

Job Description

Position: Software Engineer

Company: Tech Innovators Inc.

Location: Remote

Responsibilities:

- Develop, test, and maintain scalable web applications.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Troubleshoot, debug, and resolve software issues.
- Write clean, efficient, and well-documented code.
- Stay updated on emerging technologies and industry trends.

Requirements:

- Proficiency in JavaScript, React, and Node.js.
- Strong understanding of database systems (MongoDB, MySQL).
- Familiarity with RESTful APIs and version control systems (e.g., Git).
- Excellent problem-solving skills and attention to detail.
- Bachelor's degree in Computer Science or a related field.
